Professional Summary

Full Stack Developer with **4+ years** of experience architecting and shipping distributed applications across SaaS, FinTech, Banking, and IoT domains. Deep hands-on expertise in **React.js, Next.js, Node.js, Java Spring Boot, AWS Serverless**, and **Microservices**. Proven track record of modernizing database layers to sub-100ms latency, cutting cloud costs by **40%**, and integrating real-time telemetry, GenAI workflows, and high-volume transactional payment systems.

Work Experience

Software Developer – Dwatatech Pvt. Ltd. Pune, India
Full-Time *Aug 2025 – Sept 2026*

- Orchestrated the end-to-end architecture of a multi-tenant SaaS CRM platform, serving **50+** enterprise clients with strict tenant data isolation and granular role-based access control (RBAC).
- Led serverless modernization using **AWS Lambda, API Gateway, and SAM**, cutting monthly cloud hosting expenses by **40%** while ensuring auto-scaling for peak production traffic.
- Modernized data persistence layers with **DynamoDB** and **DocumentDB**, boosting query speeds by **35%** and reducing database latency to **<100ms**; provisioned services on EC2, S3, Cognito SSO, and SES.
- Integrated **Razorpay** for subscription billing ($100K+ processed), **Twilio** SMS/OTP verification, and **Google Cloud Maps Platform** for live route optimization.
- Deployed an **LLM-driven analytics module** generating executive summaries and predictive operational trend forecasts with **95% accuracy**.

Full Stack Developer – Flairminds Solutions Pvt. Ltd. Pune, India
Full-Time *Jun 2023 – Aug 2025*

- Engineered modular full-stack web platforms using **React.js, Node.js, Java Spring Boot, MySQL**, and **MongoDB**, supporting **5,000+** daily active users.
- Designed and deployed secure REST microservices featuring **JWT authentication** and Terraform IaC, cutting environment deployment downtime by **60%**.
- Built a real-time Scrap Management platform utilizing **Socket.io** dashboards and Frappe framework, reducing operational delay by **40%** for **200+** enterprise users.
- Created a configurable form engine for banking clients handling **100+** conditional schemas, cutting template rollout turnaround from 2 weeks to **2 days**.
- Hardened backend payment logic for an international remittance engine processing **$5M+** monthly volume with automated rollback mechanisms and KYC verification.

Software Engineer – Crack Fillers Pune, India
Full-Time *Jul 2022 – May 2023*

- Developed an IoT-driven Canteen Management System integrating **Raspberry Pi, React.js, Node.js**, and **SQLite** for automated hardware-software telemetry.
- Implemented biometric recognition (face and fingerprint authentication) for authenticated employee check-ins along with speaker API audio notifications.

Technical Skills

- **Languages & Frontend:** JavaScript (ES6+), TypeScript, Java, SQL, HTML5, CSS3, React.js, Next.js, Angular, Redux, Ant Design, Material UI, AJAX
- **Backend & Frameworks:** Node.js, Express.js, Java Spring Boot (JPA, Hibernate, Security), RESTful APIs, Microservices, Frappe Framework
- **Cloud & DevOps:** AWS (Lambda, API Gateway, SAM, EC2, S3, Cognito, SES, IAM, CloudWatch), GCP, Docker, Terraform, CI/CD, Git
- **Databases & Real-Time:** MongoDB, MySQL, DynamoDB, DocumentDB, SQLite, Firebase Firestore, Socket.io, WebSockets, IoT / Raspberry Pi
- **AI & Integrations:** LLM API Integration, GenAI Workflows, Razorpay, Twilio, Google Maps Platform, QuickBooks API, JWT, RBAC

Education

Bachelor of Engineering in Computer Engineering – Zeal College of Engineering and Research Pune, India
Cumulative Score: 8.6 CGPA *2018 – 2022*
